## PRODUCT SPECIFICATIONS

Product: Biotin-SP-conjugated AffiniPure Goat Anti-Mouse IgG (H+L)

Code Number: 115-065-003

Lot Number: 66404

Physical State: Freeze-dried powder

<u>Size</u>: 2.0 ml

Antibody Concentration: 1.1 mg/ml

 Suggested Dilution Range:
 1:20,000 - 1:400,000 for ELISA and Western blotting using enzyme-conjugated streptavidin

 1:500 - 1:5,000 for enzyme immunohistochemistry on tissue sections
 1:200 - 1:1,000 for flow cytometry and fluorescence immunohisto/cytochemistry

Buffer: 0.01M Sodium Phosphate, 0.25M NaCl, pH 7.6

Stabilizer: 15 mg/ml Bovine Serum Albumin (IgG-Free, Protease-Free)

Preservative: 0.05% Sodium Azide

**Reconstitution and Storage**: Store freeze-dried product at 2-8°C until reconstitution. When ready to use, reconstitute with 2.0 ml d. water. Centrifuge product if the solution is not clear after reconstitution. To judge clarity, draw product into a clean pasteur pipette. Product is stable for about 6 weeks at 2-8°C as an undiluted liquid. Storing the product for more than one day at final working dilutions is not recommended. For extended storage as a liquid, add an equal volume of glycerol (ACS or better grade) for a final concentration of 50% followed by storage at -20°C. Please note that the concentration of protein and buffer salts will be one-half of the original after the addition of glycerol. **Expiration date:** one year from date of reconstitution.

**Purity**: The antibody was isolated from antisera by immunoaffinity chromatography using antigens coupled to agarose beads.

<u>Antibody Specificity</u>: Based on immunoelectrophoresis, the antibody reacts with the heavy chains on mouse IgG and with the light chains common to most mouse immunoglobulins. No antibody was detected against non-immunoglobulin serum proteins, but the antibody may cross-react with immunoglobulins from other species.

## Country of Origin: USA

Note: For in vitro research use only, not for diagnostic or therapeutic use. This product is not a medical device.
