

PRODUCT SPECIFICATIONS

Product: Alkaline Phosphatase-conjugated AffiniPure Goat Anti-Rabbit IgG (H+L)

Code Number: 111-055-003

Lot Number: 70434

Physical State: Freeze-dried powder

Size: 1.0 ml

Antibody Concentration: 0.6 mg/ml

Suggested Dilution Range: 1:5,000 - 1:50,000 for ELISA and Western blotting

Buffer: 0.01M Tris-HCl, 0.25M NaCl, pH 8.0

Stabilizer: 15 mg/ml Bovine Serum Albumin (IgG-Free, Protease-Free)

Preservative: 0.05% Sodium Azide

Reconstitution and Storage: Store freeze-dried product at 2-8°C until reconstitution. When ready to use, reconstitute with 1.0 ml d. water. Centrifuge product if the solution is not clear after reconstitution. To judge clarity, draw product into a clean pasteur pipette. Product is stable for about 6 weeks at 2-8°C as an undiluted liquid. Storing the product for more than one day at final working dilutions is not recommended. For extended storage as a liquid, add an equal volume of glycerol (ACS or better grade) for a final concentration of 50% followed by storage at -20°C. Please note that the concentration of protein and buffer salts will be one-half of the original after the addition of glycerol.

Expiration date: one year from date of reconstitution.

Purity: The antibody was isolated from antisera by immunoaffinity chromatography using antigens coupled to agarose beads.

Antibody Specificity: Based on immunoelectrophoresis, the antibody reacts with the heavy chains on rabbit IgG and with the light chains common to most rabbit immunoglobulins. No antibody was detected against non-immunoglobulin serum proteins, but the antibody may cross-react with immunoglobulins from other species.

Country of Origin: USA

Note: For in vitro research use only, not for diagnostic or therapeutic use. This product is not a medical device.
