Product Specifications

Product: Alkaline Phosphatase-conjugated AffiniPure Goat Anti-Rat IgG (H+L)

Code Number: 112-055-003

Lot Number: 76727

Physical State: Freeze-dried powder

Size: 1.0 ml

Antibody Concentration: 0.6 mg/ml

Suggested Dilution Range: 1:5,000 - 1:50,000 for ELISA and Western blotting

Alkaline Phosphatase: Purified from calf intestine

Buffer: 0.01M Tris-HCl, 0.25M NaCl, pH 8.0

Stabilizer: 15 mg/ml Bovine Serum Albumin (IgG-Free, Protease-Free)

Preservative: 0.05% Sodium Azide

Reconstitution and Storage: Store freeze-dried powder at 2-8° C. When ready to use, rehydrate with 1.0 ml d. water and centrifuge if not clear. Product is stable for about 6 weeks at 2-8°C as an undiluted liquid. Prepare working dilution fresh each day. For extended storage after rehydration, add an equal volume of glycerol (ACS grade or better) for a final concentration of 50%, and store at -20°C as a liquid. Note: after the addition of glycerol, the concentration of protein and buffer salts is one-half of the original.

Expiration date: one year from date of rehydration.

Purity: The antibody was purified from antisera by immunoaffinity chromatography using antigens coupled to agarose beads.

Antibody Specificity: Based on immunoelectrophoresis and/or ELISA, the antibody reacts with whole molecule rat IgG. It also reacts with the light chains of other rat immunoglobulins. No antibody was detected against non-immunoglobulin serum proteins. The antibody may cross-react with immunoglobulins from other species.

Country of Origin: USA

Note: For *in vitro* research use only, not for diagnostic or therapeutic use. This product is not a medical device.
